- [Alshahriar78](#)

Frontend Development

HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), React.js, JSX, Component-Based UI Design

Backend Development

Java, Spring Boot (RESTful APIs, Security), Node.js, Express.js (Middleware, Routing), Authentication & Authorization using JWT

Database & Persistence

MySQL (JPA, Hibernate), MongoDB (Mongoose ODM)

Development Concepts

OOP (Object-Oriented Programming), SOLID Design Principles, MVC Architecture

Tools & Platforms

Git & GitHub, Postman, Swagger UI, IntelliJ IDEA, VS Code, Gradle, npm

I am a motivated and dedicated full-stack web developer with hands-on experience in both frontend and backend technologies, including React.js, Spring Boot, Express.js, MySQL, and MongoDB. I aim to leverage my skills to deliver impactful software solutions. Eager to grow in agile environments that encourage continuous learning, innovation, and high-quality engineering practices.
